1 Professional Standards

The Auditing and Attestation section tests audits of issuers, nonissuers, governmental entities, not-for-profit entities, and employee benefit plans. In addition to audits, this section also tests other types of engagements that an accountant may be called upon to perform, such as accounting and review service engagements and attestation and assurance engagements. Each engagement requires the accountant to follow the applicable ethical guideline(s) and standard(s) for the engagement. For example, an audit engagement requires the auditor to perform the audit in accordance with generally accepted auditing standards (GAAS). These engagements and applicable standards will be covered in more detail in later modules.

Below is an overview of standards and guidelines that will be tested in this section:

<table>

</tr>
</tbody>
</table>
| Statements on Standards for Accounting and Review Services (SSARS) | AR-C | AICPA Accounting and Review Services Committee | SSARS provide guidance for **unaudited** financial statements or unaudited financial information of **nonissuers**. | • Preparation, compilation, and reviews of historical financial statements: nonissuers  
• Preparation or compilation of pro forma financial information: nonissuers |
| **Guidelines** |                   |                        |             |             |
| Code of Professional Conduct | ET | AICPA | The AICPA Code of Professional Conduct provides **members** with guidelines for **behavior** in the conduct of their professional affairs. In addition, it provides assurance to the public that the profession intends to maintain high standards and to enforce compliance with these standards by its members. | Members of the AICPA |
| Statements on Quality Control Standards (SQCS) | QC | AICPA | SQCS provides guidance to **CPA firms** about a quality control system. A quality control system consists of policies and procedures designed, implemented, and maintained to ensure that the firm complies with professional standards and appropriate legal and regulatory requirements, and that any reports issued are appropriate in the circumstances. | CPA firms providing auditing, attestation, and accounting and review services. |
2 Auditing Guidance: The GAAS Hierarchy

There are three levels of audit guidance:

1. SAS (Nonissuers) and PCAOB AS (Issuers)
   The auditor should:
   - Use professional judgment in applying the SAS or PCAOB AS to a particular engagement.
   - Be prepared to justify any departures from presumptively mandatory requirements.
   Specific language is used within the standards to clarify the auditor's level of responsibility:
   - "Must" or "is required" indicates an unconditional requirement, which must be followed in all cases in which the requirement is relevant.
   - "Should" indicates a presumptively mandatory requirement, which must be followed in all cases in which the requirement is relevant, except in rare circumstances when departure from the requirement is permitted if there is appropriate justification, performance of sufficient alternative procedures, and thorough documentation.
   - "May," "might," and "could" indicate explanatory material that does not impose a professional requirement for performance.

2. Interpretive Publications
   Interpretive publications are recommendations regarding how SASs should be applied in specific situations. They are not considered to be auditing standards.
   The auditor should:
   - Consider the guidance provided by these publications in performing an audit.
   - Be able to explain any departures, and how compliance with standards was otherwise achieved.
   Examples include: Auditing interpretations of GAAS, exhibits to GAAS, auditing guidance provide in AICPA Audit and Accounting Guides, and AICPA Auditing Statements of Position (SOP).

3. Other Auditing Publications
   Other auditing publications have no authoritative status but may be helpful to the auditor.
   The auditor should:
   - Consider the guidance provided by these publications in performing an audit.
   - Be able to explain any departures, and how compliance with standards was otherwise achieved.
   Examples include: Auditing articles in the Journal of Accountancy (or other professional journal), auditing articles in the AICPA CPA Letter, continuing professional education materials, textbooks, and other auditing publications.

1 Audit Process Overview

The Audit Process

General Principles
- Overall objectives
- Documentation
- Communication
- Quality control—firm

Engagement Acceptance
- Ethics and independence
- Terms of engagement

Assess Risk and Plan Response
- Audit planning, including audit strategy
- Materiality
- Risk assessment procedures:
  - Understand the entity and its environment
  - Understand internal control
- Identify and assess risk
- Respond to risk

Perform Procedures and Obtain Evidence
- Test of controls, if applicable
- Substantive testing

Form Conclusions
- Subsequent events
- Management representation
- Evaluate audit results
- Quality control—engagement

Reporting
- Report on audited financial statements
- Other reporting considerations
